One of Naomi Sarna's earliest memories is being in nursery school, molding a lump of clay. She found wonder in the process and the pleasure of working with her hands. This has been a dominant theme in her life. As a child growing up in rural Montana mining country, she made jewelry from minerals, seashells and other found materials, already interested in flowing lines and the interplay of light and shadow. In her early twenties she relocated to New York City to start a very new and different life. There she became fascinated by drapery, both in classical sculpture and Renaissance painting.

Today, She incorporates this love of the flow of fabric into her gem carvings and set pieces. An opal becomes a piece of gathered fabric, and also a prism of refracted light. She is always looking for the long, sensuous line to define what a stone could and should be.

Naomi thinks of her pieces as more than jewelry or sculpture; the carving of the gem is only one part of the vision. The gem in its setting must also be in balance because there must be harmony between the jewel and the wearer. Much of her passion lies in the challenge of finding that balance and harmony through the discipline of crafting exquisite jewels with intention. A true jewel is one that once removed leaves its imprint, its memory, where it was, where it was meant to be.

She creates timeless designs inspired by the stones themselves. The response she wants her jewelry to evoke is for someone to reach for the piece, wanting to explore its lines and caress it. To find renewing pleasure and wonder to hold and to wear.
